Aspiring Software/Web Developer with advanced skills in programming, UI/UX design, and web development. I am currently studying for a Degree in Computer Science (Artificial Intelligence) at APU. I am dedicated to the development of both software and web applications that are user-friendly and efficient, as well as to continuing to improve my technical abilities. Looking for a golden opportunity as an intern where I can apply my skills of software development, system design, front-end and back-end programming, while receiving hands-on experience in a collaborative and innovative work environment. Would be available to begin from late August 2026, for a period of 4 months.

EXPERIENCE

PART-TIME TUTOR

CodeKids by EDUWEL | Kuala Lumpur

MARCH 2026 – NOW

- Teach students aged 8–17 programming concepts through interactive and project-based learning.
- Conduct classes in Python, Web Development, AI fundamentals, Minecraft coding, and Roblox scripting.
- Guide students in building beginner-friendly games (tkinter, pygame) and websites.

SOFTWARE INTERN

FootfallCam (META RESEARCH SDN. BHD.) | Kajang, Selangor

JUNE 2025 – OCTOBER 2025

- Trained AI models for accurate people counting.
 - Worked with SQL/MariaDB for data verification and system diagnostics.
 - Enhanced front-end features using HTML, JavaScript, and API-based multilingual support.
 - Developed a C# backend function to synchronize data between servers efficiently.
-

EDUCATION

DEGREE IN COMPUTER SCIENCE SPECIALISM IN ARTIFICIAL INTELLIGENCE

ASIA PACIFIC UNIVERSITY (APU) OF TECHNOLOGY AND INNOVATION

NOVEMBER 2025 - PRESENT

- Relevant coursework: EduConnect Learning Centre (ReactJS, CSS, etc.)
- CGPA: 4.00

DIPLOMA IN INFORMATION & COMMUNICATION TECHNOLOGY SPECIALISM IN SOFTWARE ENGINEERING

ASIA PACIFIC UNIVERSITY (APU) OF TECHNOLOGY AND INNOVATION

JULY 2023 - JUNE 2025

- Relevant coursework: ResearchSnake (Python), CodeMaster (HTML, CSS, etc.)
 - CGPA: 3.74
-

TECHNIQUES

- Programming Languages (Python, Java)
 - Front-end Development (HTML, CSS, JS, NodeJS, ReactJS)
 - Database Management (SQL, MongoDB)
 - Back-end Development (PHP, C#)
-

EXTRA SKILLS

- Adaptability
 - Agile Development
 - AI & LLM Integration
 - CI/CD Pipeline
 - Communication
 - Project Management
 - Team Collaboration
 - Time Management
-

EXTRACURRICULAR ACTIVITIES

GTD x APU Hackathon 2025 (by Maybank) (December 2025) – 3rd prize

- Developed SecInsight AI, an AI-powered platform that analyzes CVE CSV data to automatically generate plain-English vulnerability summaries, risk scores, priority levels, and remediation guidance using Google Gemini AI.

KitaHack (February 2026)

- Developed [ABANG KARIPAP](#), an AI-powered fake news detection platform that analyzes text and images using Google Gemini AI and Google Vision API to identify misinformation with confidence scores and detailed explanations.
- Built a full-stack web application with React frontend and FastAPI backend, featuring optional user authentication and Firebase-powered history tracking for personalized detection records.

UM Hackathon (March - April 2026)

- Built FoodLoop, an AI-powered food redistribution platform using Z.AI GLM for intelligent donation matching, featuring unstructured input parsing, multi-step workflow orchestration, and automated NGO ranking by food type and distance.
- Developed session-based conversation handling with PostgreSQL, Docker containerization, and HTML/CSS frontend, achieving complete donation tracking from listing to pick up confirmation.

AWS CendekiAwan Hackathon (April – May 2026)

- Developed [Care AI](#), an AI-powered medical report interpretation platform that can analyze the medical documents and transform complex clinical terminology into plain-language explanations, risk insights, and personalized health recommendations using AWS PartyRock and LLM integration.
